## CLEAN VERSION OF EACH REPLACEMENT PARAGRAPH/SECTION/CLAIM AND INSTRUCTIONS FOR ENTRY

## **IN THE SPECIFICATION:**

As a result of these procedures, the disease specific marker having a sequence identified as SEQ ID NO: 1 was found. This marker is characterized as Alpha Fibrinogen having a molecular weight of about 1350 daltons. The characteristic profile of the marker is set forth in Figure 2. As easily deduced from the data set forth in Figure 1, this marker is indicative of an individual suffering from renal failure or myocardial infarction.

## IN THE CLAIMS:

- 1. A biopolymer marker having a sequence identified as SEQ ID NO: 1 useful in myocordial informion or menal failure.
  indicating at least one particular disease state:
- 17. The diagnostic assay kit of claim 10, wherein said marker includes the sequence fillentified as SEQ ID NO: 1 and said biochemical material is at least one monoclonal antibody specific therefore.
  - 18. A kit for diagnosing, determining risk-assessment, and identifying therapeutic myocondial infartion or reval failure: avenues related to a disease state comprising:

at least one biochemical material which is capable of specifically binding with a

Copishing of

biomolecule which includes at least one biopolymer marker including the sequence identified as
